

## **Fence In A Storm** (Buddy Mondlock)

Fence post standing there weather worn  
Barbed wire up against a summer storm  
The wind comes up  
The sky blows around  
The fence stands still  
While the rain comes down

Everything happens at the very same time  
But people want to make the world wait in line  
This comes first  
That not yet  
But it rains when it rains  
And the world gets wet

**CHORUS**     I don't know  
                  Why everything don't go slower  
                  I can't see  
                  But somehow I'm supposed to show her

She's so tired and it makes her sad  
Walking 'round all the time feeling bad  
She had a plan  
She had it down  
But the world keeps knocking  
That girl around

She knows money can't buy you love  
But love can't always keep you're head above  
Water falls  
Come crashing down  
And the girl in the barrel  
Hears that roaring sound

### **(CHORUS)**

Fence post never seems to have a care  
Wonder how long that fence been there  
Three tornados and a hurricane  
The wind blows through  
And that fence remains

### **(CHORUS 2X)**
